

1 REMOVE OLD PLANTS

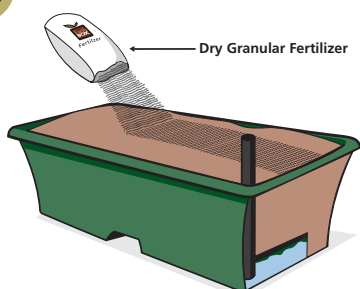

To replant, cut off the old plants at the cover line. Remove the old cover.

2 DIG OUT OLD FERTILIZER

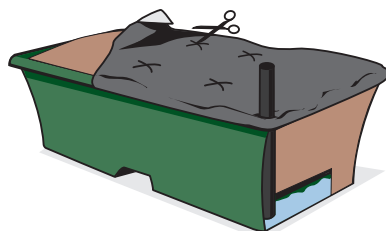

Dig out the old fertilizer and any remaining large roots. Top off with potting mix, making sure it is wet throughout.

3 ADD NEW FERTILIZER

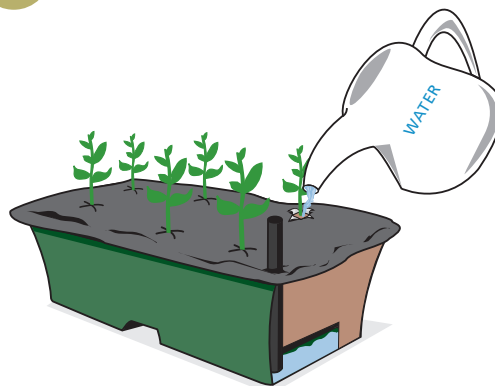

Choose a FERTILIZER AND PLANT PLACEMENT PATTERN at right. Using potting mix, create a slight mound where you will place the fertilizer. Then pour the bag of dry fertilizer in a 2-inch wide strip directly on top of the new mound, and gently pat it down. **DO NOT MIX THE FERTILIZER INTO THE POTTING MIX OR SPREAD IT AROUND.** You may replace the fertilizer with 2 cups of your favorite dry or organic fertilizer. Make sure you do not mix the fertilizer into the soil. Do not use a water soluble fertilizer such as Miracle-Gro™.

4 COVER, SECURE AND CUT

Included in this kit are 2 fitted plastic mulch covers, one as an extra. Both are equipped with a black side and a white side. Keep the **BLACK SIDE UP**, except in desert climates or Florida summers – where the white side should face up. Align one of the round cutout holes over the fill tube and carefully stretch the cover over the top of the EarthBox like a fitted sheet. When the cover is secure, cut a 3-inch "X" in the cover for each plant, **AS FAR AWAY FROM THE FERTILIZER STRIP AS POSSIBLE.**

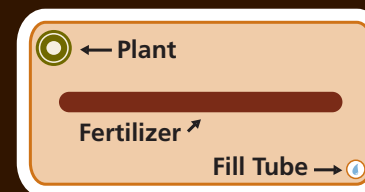

5 PLANT YOUR GARDEN

Through the cover dig 2 to 3-inch-deep planting holes into the potting mix, just as you would in the ground. Place one seedling per hole and firm the mix around the roots. **JUST THIS ONE TIME**, pull back the "X" flaps in the cover to water the plants from the top to remove any air spaces from around the roots. Then carefully put the flaps back around the stems.

Fertilizer & Plant Placement Patterns:

(LEGEND)

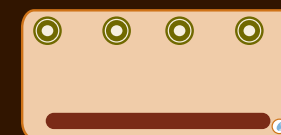

(Number of seedlings needed)

Single Row

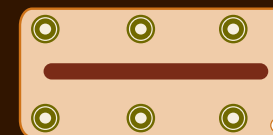

(2 per row)

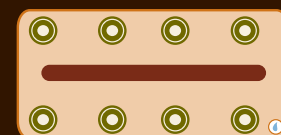

(4 per row)

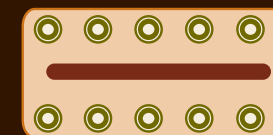

Double Row

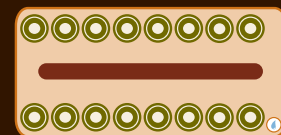

(3 per row)

(4 per row)

(5 per row)

(8 per row)

FOR THE VERY BEST RESULTS:

Listed below are the recommended number of seedlings per variety of plant.

- Artichokes (2 seedlings)
- Beans (16 seedlings)
- Bell Peppers (6 seedlings)
- Broccoli (6 seedlings)
- Brussels Sprouts (6 seedlings)
- Cabbage (6 seedlings)
- Cauliflower (6 seedlings)
- Celery (6 seedlings)
- Chard (6-8 seedlings)
- Corn (16 seedlings)
- Cucumbers (4 seedlings)
- Eggplant (2 seedlings)
- Flowers (6-8 seedlings)
- Herbs (6 seedlings)
- Hot Peppers (6 seedlings)
- Kohlrabi (8-10 seedlings)
- Leeks (8 seedlings)
- Lettuce (8-10 seedlings)
- Melons (2-4 seedlings)
- Okra (8-12 seedlings)
- Onions (8-12 seedlings)
- Peas (12-16 seedlings)
- Salad Greens (6-8 seedlings)
- Spinach (6-10 seedlings)
- Squash (2-4 seedlings)
- Strawberries (6 seedlings)
- Tomatoes (2 seedlings)
